ABOUT ME

Second-year Computing student with basic knowledge of **HTML, CSS, Python, and SQL, along with skills in UI/UX design and wireframing** using Figma. Seeking an internship opportunity to apply my existing knowledge in a professional environment, gain hands-on experience, and contribute to real-world projects. Eager to strengthen my current skills, learn new technologies, and develop a deeper understanding of the IT industry while developing a strong foundation for my future career.

TECHNICAL SKILLS

Language	: Python
Web Dev	: HTML, CSS
Database	: SQL, Database Design
Interface Design	: UI/UX Design, Wireframing
Tools	: Figma, Visual Studio Code, GitHub, phpMyAdmin, Cisco Packet Tracer, Microsoft office

EDUCATION

Arden University — SIMS College

Sharjah, UAE

BSc (Hons) Computing

Expected Graduation: 2028

PROJECTS

Tourism Website	Website Link	GitHub
Developed a responsive tourism website with multiple web pages, destination information, travel guidance, activities, image galleries, and a contact form, using clear navigation and a user-friendly layout to make travel information easy to explore.		
Library Event Management Database		Github
Designed and implemented a normalized relational database by creating an ERD, 8 interconnected tables, relationships, and SQL queries to manage events, bookings, members, rooms, staff, feedback, and payments, ensuring accurate and well-structured data.		
Python Student Mark Classifier		Github
Developed a Python program to classify student marks into Fail, Credit, and Distinction. Used functions, conditional logic, input validation, and error handling to provide clear and accurate results for different mark inputs.		
Locker Data Structure System		Github
Created a Python-based locker system using lists and dictionaries to store and manage locker records, including adding, searching, filtering, updating, counting, and resetting locker information.		
Smart Locker Management System		Github
Created a Python simulator to manage 7 lockers for storing and collecting luggage. Added customer verification, storage time tracking, payment calculation, and luggage handling.
